

Hands-on Task: Uploading Videos to Video Cloud

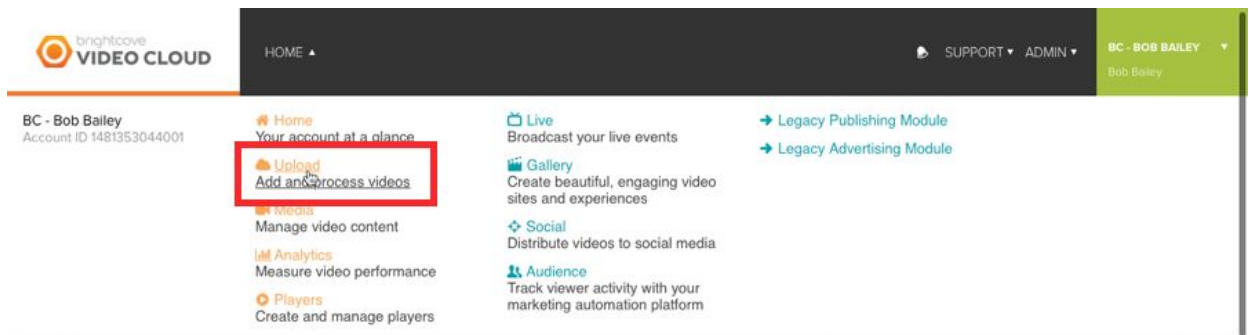

In this task you will upload several videos to Video Cloud. Before proceeding, you should [download](#) the sample videos zip file or have some sample video clips you can use.

Login to your Video Cloud account

1. In a browser window, navigate to <https://studio.brightcove.com>.
2. Enter your credentials and click Sign In.

Upload local videos to Video Cloud

Click **Upload** to open the Upload module.

3. In the Upload module, select an ingest profile.
4. Click **Browse for Videos** and browse and select all of the sample videos that were provided.
5. The page will display all the videos and the upload progress.

Note: It is possible to click the **Edit** button next to the filename to edit some of the video metadata. Adding video metadata is covered in the next Quick Start topic.

Upload remote video to Video Cloud

6. In the Upload module, click **Enter URL**.
7. Enter the following URL to a file which is hosted on an Amazon S3 account.
`http://learning-services-media.brightcove.com/vc-quick-start/oystercatcher.mp4`
8. Click **Process Video** to begin the upload.

(Optional) Upload videos using mobile device

9. Using a mobile device, open Video Cloud Studio at <https://studio.brightcove.com>.
10. Open the **Upload** module.
11. Select an ingest profile.
12. Click **Browse for Videos**. The camera roll application on the device should open.

13. Select a video to upload. The upload will begin and the upload progress will be displayed.
